Vote NO on Initiative 1183

Children depend on adults to keep them safe from harm.

Our state's current liquor control system keeps kids safe. By shattering that system, Initiative 1183 would endanger more children and their parents. I-1183 allows for the proliferation of private liquor stores peddling hard liquor in vulnerable communities. Data proves that with our public liquor stores, fewer kids have access to controlled substances than in nearly any other state. Less access to alcohol means we avoid thousands of tragic and costly public-safety incidents each year.

The Children's Alliance urges a NO vote on Initiative 1183.
